15:43:12 From Jim Julius : Hi everyone
15:51:27 From Lisa Taylor : yep
15:51:27 From Amanda Hill : I can hear you 15:51:29 From Nancy Thuleen : Coming through fine! 15:51:32 From Leola McClure : hi
15:51:32 From K.D. King : OK
15:51:34 From Anna Alessi : Hi Jim :)
15:51:34 From Shannon Myers : HOWDY
15:51:38 From Shannon Myers : LOL
15:56:24 From K.D. King : Good. I was worried that you only had one outfit.
15:56:26 From K.D. King : ;)
15:56:42 From Michelle Panik : Ha!
15:56:53 From Shannon Myers : It can be your prez shirt:) 15:57:22 From Shannon Myers : I LOVE Zoom!!!
15:58:49 From Shannon Myers : Just be sure to sign up the right way so you aren't limited to 40 min meeting
15:59:35 From Jim Julius : http://conferzoom.org
15:59:43 From AKae760 : thx!
15:59:49 From Kerry McCoy : ty
16:00:26 From Shannon Myers : That way if you're working at your computer you can hold some spontaneous office hours 16:00:57 From Darlene : Good afternoon!
16:02:56 From Lanier Castillo : Hello
16:04:39 From Jim Julius : http://goo.gl/w3Ufq4
16:10:18 From Mike Fino : Do you remember which standard? 16:10:37 From Mike Fino : k thx :)
16:16:17 From Shannon Myers : Script is way easier...I utilized the captioning grants offered to MCC...I make guided notebooks so there is somewhat of a script but not enough for me to caption
16:19:25 From Shannon Myers : Robert E is awesome!!! 16:20:09 From Shannon Myers : That's what I use:) 16:20:17 From Lisa Taylor : 3C is great!
16:21:13 From Jim Julius : http://3cmediasolutions.org 16:25:13 From Shannon Myers : Thank you!
16:26:04 From Don Dean : Captioning lengthy video disccussions I was told is not necessary.
16:26:32 From Don Dean : Thanks for clarifying
16:31:37 From Mike Fino : State agencies care to the extent that they reference FERPA in Title 5. So they are not additive, which I think is what you meant, but they

definitely care.
16:32:34 From Lisa Taylor : So, not going for RateMyStudent any time soon? lol
16:36:37 From Shannon Myers : Can only go to rate my student when buoyed by friends and cocktails lol
16:37:06 From Lanier Castillo : Is FERPA protection applicable if the content cannot be tied to a specific student? For example, can I anonymize a student submission and use it as an example piece?
16:38:07 From Nancy Thuleen : Textbook integration like McGraw-Hill, etc … is that something we need to worry about? I’m unclear on why, if so.
16:38:10 From Shannon Myers : I meant rate my professor! 16:38:20 From Lanier Castillo : thanks
16:39:33 From pskemp : If a student has given written permission to use their paper as an example for future courses, and the student has given permission to use their name (they would like credit for their work), is it OK to keep the student's name on the paper?
16:48:11 From Shannon Myers : My advice is to send all emails through Canvas or BB. Some students were not receiving emails I sent through Canvas via my MCC email. 16:48:12 From Don Dean : Thank for explaining those Federal Guidelines. I understand better now why this is insisted upon.
16:48:59 From Shannon Myers : But in Canvas it is saved and SURF is not
16:49:35 From Don Dean : After I started actually meeting students online it really made the online class come alive for me. I felt I was in classroom.
16:52:29 From Lisa Taylor : I like to use the Canvas gradebook drop down to write to students who did well or poorly on an assignment.
16:52:49 From Nirmala : My students have always appreciated quick response to their questions
16:53:23 From Lisa Taylor : It sends a Canvas message. 16:53:34 From Shannon Myers : I started using zoom and created relevant discussions (study skills, favorite theorem, etc)
16:59:53 From Nancy Thuleen : does 3C Media have any anti-copying protections to prevent students from doing that? 17:00:35 From Nancy Thuleen : Okay!

17:02:48 From Mike Fino to Jim Julius (Privately) : Nice job! I think this went really well. I'm signing off. I hope you didn't feel undermined about my Title 5 comment. I was acting as a participant but know that I was here as an observer. It wasn't at all intended to challenge you -- hope it didn't come off like that.
17:03:18 From Shannon Myers : Proctored exams help with cheating
17:04:25 From Don Dean : I once had a student who was taking the class both for himself and another student in my class.
17:06:34 From Darlene : The ability to screenshot exam questions, etc. adds to the problem.
17:06:57 From Amanda Hill : While it doesn’t cover all assignments, I have students do some video assignments to mitigate cheating issues a bit.
17:14:45 From Lemee : I use MyMathLab for my online math
courses

17:15:54 From Lemee : Yes, I am!
17:16:15 From Shannon Myers : You are right, Jim. I used to use only MyMathLab to communicate with students, but after using BB and now Canvas I feel confident that students are receiving all communiques.
17:16:21 From Nirmala : I just MyMathLab and all exams are proctored at APC.
17:18:36 From Lisa : Students seem to think that on-line courses are easier than face-to-face classes, and some get underwater before they realize they must put effort into on-line courses.
17:18:54 From Shannon Myers : That's exactly right, Lisa! 17:19:43 From Rhonda Welch : @Lisa I agree and they also believe that an 8 week class won't require a lot of time 17:19:58 From Shannon Myers : I think that "gap" students need more education to decide whether or not an online clss will work for them.
17:20:48 From pskemp : A colleague at College of the Canyons said their online success rate is higher than their onground success rate. Do you know what they are doing that has made their online program so strong?
17:22:04 From Nirmala : I email students FAQ about what students can expect out of an online class and who should be taking the online class before enrolling in MyMathLab.

17:23:59 From Leola McClure : thank you so much, jim 17:24:02 From Darlene : Thank you very much, Jim! 17:24:03 From Wesley Ha : thanks
17:24:08 From Elaine Loughrey : thanks
17:24:09 From Lanier Castillo : Thank you!
17:24:09 From Nathaniel Cohan : thanks Jim! very informative
17:24:18 From Lisa Taylor : Thanks
17:24:21 From Najen : Thank you!
17:24:21 From Rhonda Welch : Thank you! Great info 17:24:22 From Don Dean : A great session, Jim!
17:24:31 From Eli Clarke : Thanks!
17:24:32 From Kavita Patel : Thanks for all the resources and great ideas. Very informative.
17:24:38 From AKae760 : thanks Jim! Lots of info, good session
17:24:38 From Eli Clarke : Very informative
17:24:42 From Jim Julius : http://goo.gl/w3Ufq4
17:24:43 From Lemee : Thank you!
17:25:07 From Kerry McCoy : Thank you so much, Jim! 17:25:20 From pskemp : They said across the whole college. 17:25:28 From Nirmala : Thanks Jim! Very informative. 17:26:26 From pskemp : Good points - thanks! Great workshop filled with useful information.
17:26:37 From Lisa : I'm not teaching on-line yet, but you had plenty of information I can use with my face-to-face course that is increasingly using on-line resources.
